

clever – creative – sustainable – smart

utz EUROWAVE
Suitable for your applications

utzgroup.com

Line up your business.

utz **EUROWAVE**

The EUROWAVE is a new container designed for daily storage and transport tasks within business and leisure. The tote is equipped with many bespoke 'Utz' features, which Utz likes to thrive off. For example, it is clever because it can be easily handled and has a sturdy structure. It is creative because it has a dynamic

profile in all aspects. It is sustainable because it is produced from UIC[®] material (Utz Industrial Compound). And it is Smart because it is available in 5 different dimensions (please see overleaf for dimensions).

In great shape!

The first impression: The EUROWAVE instantly puts you in a good mood! Fresh colours and dynamic lines around the tote, set clear accents and bring momentum to your application. Line up your business!

Easy to handle!

Behind the new design are tangible advantages. These include comfortable handling due to the tote being light weight, and having integrated shell handles. Also, the tote has high stability meaning it can be expanded with many additions to suit your business' needs!

Attractive in the market!

The EUROWAVE shows its quality and details all of our 'know-how', for transport and logistics. Due to the product being manufactured from UIC[®], this means that it is lighter in weight. This incidentally has a positive impact on the pricing!

Sustainably produced!

The tote is preferably manufactured from UIC[®] (Utz Industrial Compound), and stands as an umbrella brand for all secondary raw materials that are used for the production of Utz products. Products made from UIC[®] offer the same material properties as normal PP, and therefore fulfil the standard Utz Quality. Furthermore, UIC[®] meets our principle of sustainability and resource conservation.

On request, we are happy to produce your EUROWAVE containers made of virgin material in many attractive colours.

One system, 5 dimensions.

From the combination of two basic dimensions and three heights, we have created five containers with lids in the new EUROWAVE design. Always suitable for your application. Ideal for small parts, tools, accessories, or bulky goods.

	Article number	Dimensions W x D x H [mm]	Volume [l]	Weight [kg]
1	54-4030-120	400 x 300 x 120	10,0	0,6
2	54-4030-220	400 x 300 x 220	19,4	0,8
3	54-6040-120	600 x 400 x 120	21,2	1,0
4	54-6040-220	600 x 400 x 220	41,3	1,4
5	54-6040-320	600 x 400 x 320	61,5	1,8

Cover

Article number	Basic size [mm]
54-4030-0	400 x 300
54-6040-0	600 x 400

Stable.

Precise corner columns all around the tote for a strong look and high stability in everyday use.

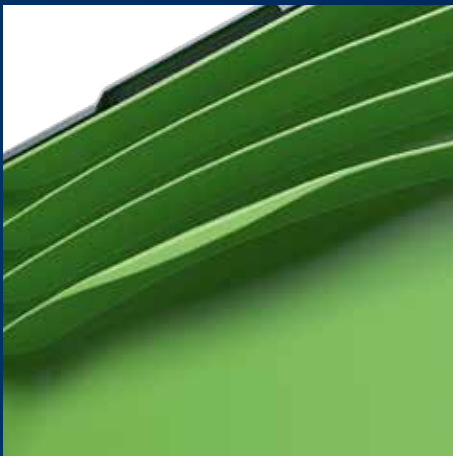

5

4

Suitable for your application. Functional in the details.

Handy.

Shell handles for comfortable handling – harmoniously integrated into the EUROWAVE shape.

Protected.

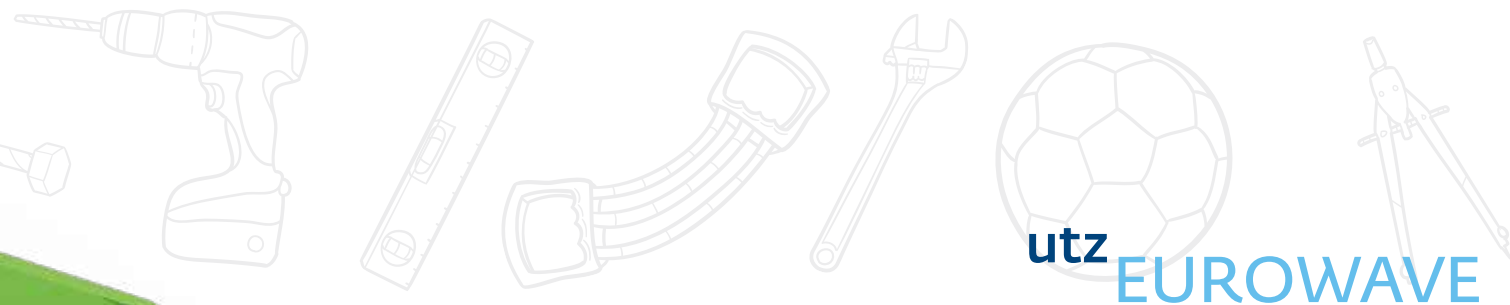

Cover, flush closing to protect against dirt and moisture. Available for the two basic sizes.

Practical.

Saving space made easy: EUROWAVE can be stacked securely and safely – even with a lid.

utz **EUROWAVE**

Expandable.

Will the EUROWAVE move through a warehouse from A to B? Not to worry! The containers fit on the Utz transport rollers in any dimension. Accessories: Utz label pockets for spontaneous, changing labels in the exchange of goods.

Individually.

Individual identification with your dealer or brand logo for clear assignment at a glance.

Accessories: label pockets with two- or three-sided edge. For welding, riveting or sticking.

Transport roller for easy handling, if the load should be too heavy. (e.g., 600 × 400 mm transport roller, Order No. 80-156-1)
